PROFESSIONAL PROFILE

Senior ServiceNow Developer with experience designing, developing, and maintaining enterprise ServiceNow solutions across ITSM and custom business applications. Experienced in building integrations, automating business processes through Flow Designer, configuring Service Portal components, and supporting Agile delivery as a Substitute Scrum Master. Strong background in full-stack web development using React, Next.js, and Node.js, complemented by several years of customer service and technical support experience.

Skilled in translating business requirements into scalable technical solutions while collaborating with cross-functional teams to deliver high-quality enterprise applications.
